

# Radiance™

## ECO-REFRESH: Used Air Freshener Recycling

The environmentally friendly, closed-loop, recycling program for old air freshener refills.

### What is it?

Radiance™ has partnered with the **Eco-Refresh** closed-loop recycling program that takes in those old Radiance and Fresh Products refills to recycle them into new air fresheners. It's EASY! Best of all, it doesn't cost you anything to take part in this program - they even pay for the shipping\*!

### HOW IT WORKS

**STEP 1** - Make sure your products qualify for this recycling program. The air fresheners may ONLY be any of the following products, (all colors and fragrances of the products are acceptable, and may be shipped together):  
• Eco Air Refill • ourfresh & ourfreshe Refill • Others listed on [Eco-Refresh.com](http://Eco-Refresh.com)

**STEP 2** - After use, clean and place the air fresheners in a shipping box that will hold **at least 10lbs** (around the size of a typical copy paper box). Seal box securely.  
*\* There is a 10 pound minimum per box to qualify for free shipping.*

**STEP 3** - Go to [Eco-Refresh.com](http://Eco-Refresh.com), click the button to print your free\* UPS return shipping label. Tape it securely it on the box.

**STEP 4** - Drop the box off at your local authorized UPS shipping center, hand it to a UPS driver, or arrange for a pick-up on [Eco-Refresh.com](http://Eco-Refresh.com). That's it. You're done!

WASTE REDUCTION

To protect our environment, products are formulated with biodegradable and/or recycled raw materials. The Eco-Refresh program dramatically reduces the amount of waste generated. Great products, great performance, and better for the environment!
